

C3IT

Test – One coding Question + Aptitude test (25 questions) + 4 Reading Comprehensions (3 questions in each)

Coding Round – In that we were told to write the pseudo code and then the code which you will be writing on your ide. First you have to get checked with your written pseudo code and code on the paper if that is going to be right then you are allowed to do the coding on the laptop. After that you have to make a pdf file of your pseudo code and outputs.

Question –

Print this star pattern taking the length and width. (not really necessary to give two inputs I took one only)

```
* * * * *
* * *   * * *
* * *   * * *
* *     * *
*       *
* *     * *
* * *   * * *
* * * * *
* * * * *
* * * * *
```

Aptitude round Questions (total 25 questions)

1. If one tyre of a car suddenly gets stolen and after sometime u find the tyre without the screws how will u make ur journey complete?
2. An orange colored glass has Orange juice and white colored glass has Apple juice both of equal volumes. 50ml of the orange juice is taken and poured into the white glass. After that similarly, 50ml from the white glass is poured into the orange glass. Of the two quantities, the amount of apple juice in the orange glass and the amount of orange juice in the white glass, which one is greater and by how much?
3. There are 9 coins. 8 coins weigh 1 gram and 1 coin weighs 2 grams. How will you find out the heavier coin in a minimum number of weighings and how many weighings will be needed? (This question was asked in two companies from me)

The topics from which there were questions – Age Problems, Time Speed Distance, Puzzle questions(majorly this were asked in the aptitude test)

Interview Round-1

1. Introduce yourself.
2. What you know about OOP.
3. What is Encapsulation, Abstraction
4. What is interface
5. Boxing and Unboxing
6. Solid Principles
7. Design Principles
8. Why you have less marks in CCEE
9. How much time will you take to learn a new module if we will provide you with the learning material, Will you be able to deal with foreign client in 6 months.

Interview Round - 2

1. Is your code 100% working
2. What you will do to optimize this code
3. Why you took only one input and do you think its ok to do so
4. Real life example of Polymorphism.
5. What is interface and abstract class.
6. Give an example of real life with respect to Function Overloading.
7. What is CSS, What are different selectors in CSS
8. What is Javascript and JQuery, What is the punch line of JQuery
9. What is Bootstrap how you will define it

Vervotech

(In this I was not selected after 2nd round of interview but adding questions from this also, as I think it will be really helpful)

Test – 3 Coding Questions, 20 Aptitude Question

(All to be done together not like what we had in c3it)

Coding – Q1. Star Pattern

```
*  
**  
***  
****  
*****
```

Q2. The total number of counts for each character occurring in a string.

Example: apoorva

a: 2, p: 1, o:2, r:1, v:1

Q3. Number of combinations for the input of 2 digit number.

For 1: there is no character assigned.

Example: input given – 23 Output – {ad, ae, af, bd, be, bf, cd, ce, cf}

Interview Round-1

1. Introduce yourself
2. What was your role in the project
3. Draw the ER diagram for it.
4. Asked a situational based question based on my project which I was not able to answer properly.
5. What is abstract class can you make an instance of it can you write a constructor in it.
6. What are react components and there types.
7. Difference between the interface and abstract class.
8. Gave a database query to me.

Col1 of table t1

1
0
1
0
0

I had to write a query that can change the 1-> 0 and 0->1.

9. What is indexing
10. Write the code for this star pattern

```
  *  
 * *  
* * *  
* * * *  
* * * * *
```

11. What are searching algorithms what is binary search its time complexity.
12. Why we use Hashset
13. Why you have less marks in this subjects...

Interview Round -2

1. Introduce yourself
2. How was your experience of doing cdac
3. What mistakes you have made why less marks etc.

4. About project what was your role what your group partners did. Is your project deployed
5. Another situational based question was asked regarding the project
6. Questions on OOP and abstract class interfaces.
7. How many coding questions you have solved give a count.
8. Gave me that puzzle of 9 balls 8 have same weight 1 is of less weight minimum iterations to get the less weighted ball.
9. The code for finding prime numbers from a given range of numbers.

Note: There are so many questions I am not able to recall now specially of the aptitude test questions. But I hope this much is enough to give you an idea of interviews and tests.

My experience

This were my 2 company processes which I shared and both were of .net I felt that basically they were checking the logic and the basic concepts you had or not.

PUZZLES were asked majorly. And basic coding questions.

Some extra tips: Just believe in yourself, Don't get frustrated with the long waiting hours to get to an interview, just be calm and as Atul Sir says enjoy the placement process.

All the best EVERYONE.

- Apoorva Vairagi
